**SR A1A North Causeway Over the Intracoastal Waterway (ICWW)  
Bridge Replacement Project**

As of this week, 2/25/24, the A1A North Causeway Bridge Replacement Project in Fort Pierce is 38% complete, with 5 of 6 foundations on the east side finished!

Substructure and foundation work has now begun on the Intracoastal Waterway and west side of the project. The new high-level fixed bridge will provide navigational clearances of 85 feet vertical and 125 feet horizontal at the waterway channel, minimizing impacts to traffic by eliminating bridge openings.
